THE LINK TO SUCCESS COACHING MODEL

PEACE | PURPOSE | PROSPERITY

Finding the purpose of why you want what you want or do, and aligning your efforts, energy, and action in relation to your core beliefs - is a process that needs specific and careful attention. Fulfilling every day with passion, purpose, and discovery into being the person that you have always desired to be, is what we are all about.

Our process engages a client on a journey of discovery into self-awareness and transformational change, that brings the client to the best place they want to be and enables them to live the life they desire or aspire to.

Through a process dialogue we enable our clients to obtain a fulfilling life. We use best practices in all areas of business, psychology, philosophy, sports and spirituality to blend into partnering with our clients through thought provoking and creative process that inspires them to maximise their personal and professional potential.

YOUR JOURNEY TO SELF SUCCESS

LIVING IN VICTORY

We go through a process of clearly identifying clear and precise purpose relating to where the clients are in their life's journey.

Establishing whether the client and the coach have a compatibility to engage in a formal coaching agreement that will benefit both parties in alignment with their values and to confirm a trustworthy environment of self-development.

We discover the real underlying intentions of what the client seeks to achieve in their life.

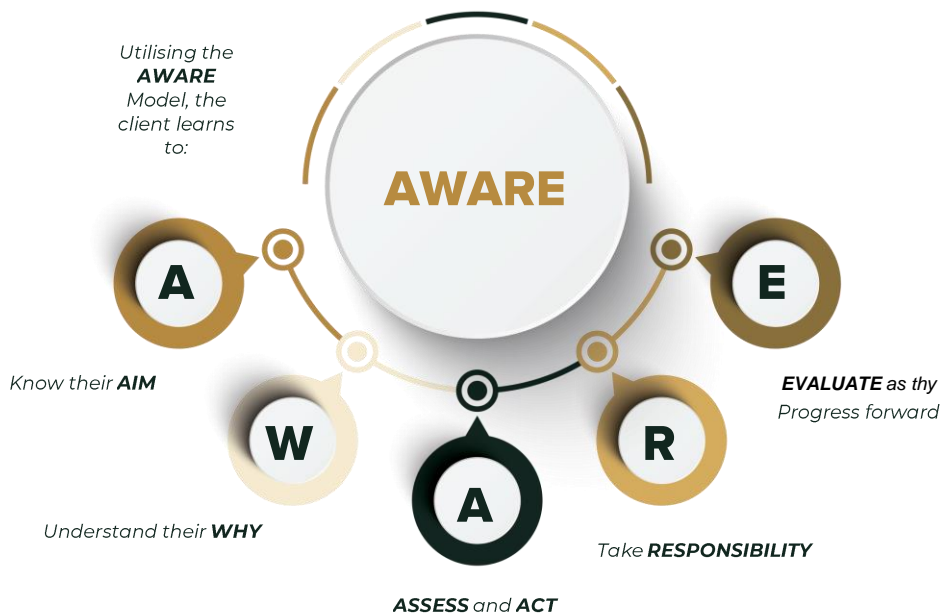

Through careful dialog we partner with the client to identify their own set beliefs and values and allow a process to flow to enable them to blend themselves into their ideal life.

IDENTIFYING YOUR AWARENESS

Through careful conversation we enable our clients to focus on establishing key drivers that are important to enabling themselves to benefit from what they are seeking to achieve on their journey.

Identifying their own **awareness** in taking responsibility to set forward progression paths is how we clarify the gaps that need attention and start creating commitments to self-improvement.

As the client shows up for success, they start acknowledging what it represents to them, and starts a journey of building upon a solid foundation of natural progression. Once the client and the coach agree; accountability platforms are set and established to best serve the client's needs and forward progression.

NAVIGATING FORWARD

We as the coach, partner with the client, explore best practice tools in establishing relevant and positive change to assist the clients in taking full control of their own destination.

We develop and maintain a forward focus for the client that fits into their daily activity and set clear and precise meaningful goals.

In partnering with the client, we establish their personal best applications, by igniting their passions with powerful questions and tools to support their unique talents with a tool kit of relative contributions that assist their self-improvement journey.

We acknowledge and support the clients' expressions and self-beliefs and work through their concerns by inviting new discovery to make them more at peace in themselves.

Putting forward manageable steps that are realistic and achievable

We then partner with the client to take action and establish constant accountability that works for the client

KNOWLEDGE IS POWER

We share self-development knowledge for deeper exploration for the client to explore a clearer understanding of self-acknowledgement, self-gratitude and the use of a toolbox of acquired skills that truly transform lives and enable people to live the best life that they want.

Coupled with this we have the **LINK2SUCCESS** academy which enables our clients to engage on a journey to personal development and growth to establish:
